TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SQL, PHP

Frameworks: ReactJS, React-Native, Hono

Libraries: ShadcnUI, TanStack, Material Tailwind, TailwindCSS, Drizzle ORM, Zod

Databases: MySQL

Developer Tools: Firebase, Supabase, Webstorm, Visual Studio Code, Git, Github, Figma, Postman

PORTFOLIO

DyipSpot: Real-Time Jeep Tracking | *React Native, Firebase, Expo, Mapbox,*

- Built a real-time mobile application for tracking public jeeps using React Native, Expo, and Mapbox
- Implemented live GPS tracking so passengers can view the jeep's location, route, and estimated arrival time on an interactive map
- Enabled drivers to set custom routes and see nearby passengers based on real-time location data
- Used Firebase Authentication with Google OAuth for secure login and role-based access (driver/passenger)
- Developed background location tracking, maintaining continuous GPS updates even when the app is minimized
- Ensured real-time synchronization of route, location, and passenger data between drivers and commuters
- [GitHub](#)

Music Player | *React (TypeScript), React Query, Spotify API*

- Built a modern web-based music player using React (TypeScript) with integration of the Spotify Web API
- Implemented Spotify OAuth authentication, enabling secure login and access to user playlists, albums, and saved tracks
- Utilized React Query for efficient data fetching, caching, and synchronization, reducing redundant API calls and improving performance by ~40%
- Developed core music player features including play, pause, and skip with real-time UI updates
- Implemented a dynamic search feature for songs using the Spotify API with optimized API requests
- Designed a responsive and user-friendly interface with smooth navigation and seamless playback experience
- [GitHub](#)

Pudoc West Children Monitoring | *ReactJS, Firebase, Tailwind (Firestore, OAuth)*

- Built a web-based application to track and monitor the nutritional status of children in Pudoc West using ReactJS and Firebase Firestore
- Automatically determines the health status of each child (underweight, normal, or overweight) based on inputted height and weight
- Used Firebase Firestore to securely store and manage health records with real-time updates
- Integrated Google OAuth via Firebase Authentication for secure and simplified login
- [GitHub](#) | [Live app](#)

EDUCATION

ILOCOS SUR POLYTECHNIC STATE COLLEGE

Bachelor of Science in Information Technology

2021-2025
